These heavy-duty American made hydraulic hand jacks are built for service under constant use. They feature a heavy-duty ductile-iron base (3 to 20-ton) for a wide stance and positive load support. All units feature a fluid bypass and a stop ring to prevent damaging over-travel.

The intended use of all these models is for heavy-duty trucks, farm equipment, building construction, mobile home set-up, and as original equipment for manufacturers of many products.

**Two piece 21" zinc-plated handle provided**
