

Hi Range Bottle Jacks 3, 5, 8 & 12 Ton Capacity

Intended Use: Heavy-duty, professional quality, 100% USA made hydraulic bottle/ hand jacks built for service under constant use and durable enough to last a lifetime. For vehicles of all types and sizes, heavy-duty trucks, military and defense vehicles (FMTV, LMTV, etc.), farm equipment, building construction, emergency vehicles, and/ or in conjunction with original equipment manufacturers of various products.

Features:

- Up to 33% more lifting height over standard hydraulic models. Hi-Range models feature larger rams, larger bases and larger pumps than the comparable standard model.
- Heavy-duty 65-45-12 ductile iron castings for both the base and head cap of each model.
- Electroless nickel plated steel ram to protect against rust.
- Machined base castings have smooth surfaces and tight tolerances to increase longevity.
- Large base provides wide stance and positive load support.
- 50% safety overload factor per ASME/ PASE hydraulic bottle jack standards.
- Safety fluid bypass system prevents the user from overloading/ damaging the jack so it cannot be used beyond the ASME/ PASE load-limiting standard.
- Ram stop ring prevents ram from being overextended.
- Two (2) piece (21" Long) zinc plated handle set.

Capacity (TONS)	Model Number	A	B	C	D	E	F	Carry Handle	Ship Wgt.	Repair Kit	Base L	Size W
