These heavy-duty American made low profile hydraulic hand/ bottle jacks are built for service under constant use. They feature a heavy-duty ductile-iron base for a wide stance and positive load support. All units feature a fluid bypass and a stop ring to prevent damaging over-travel. The intended use of all these models is for heavy-duty trucks, farm equipment, building construction, mobile home set-up, and as original equipment for manufacturers of many products. The 12-Ton model comes with a two-piece 21" zinc-plated handle and single piece release. The 20-Ton model comes with a three-piece 31" zinc-plated handle and a two-piece release.
